

Who we are ?

Star Grace Mining Co.,LTD is a privately owned company established in 1990 as a mining and factory of Magnesium Oxide.

Advantage:

1.Mining Capacity: Annual mining capacity: 1,000,000 tons, it can be continuously mined for almost 100 years.

2.Equipment: 32 calcination furnace

3.Abundant Reserves: With 70,000-100,000 tons mineral and 5,000-10,000 tons, half-finished material prepared in store to shorten the delivery time and ensure daily production.

4.Production Capacity: More than 300,000 tons annual output to maintain stable supply from global requirements.

5.Export Volume

Export capacity is 188000MT per year to Europe, South America, Southeast Asia, Australia...

6.Quality Approval: ISO9001, ISO14001, Fami-QS certificate

Land Transportation Advantage

By bulk vessel shipment:

Loading Port :Bayuquan

1. One hour to deliver cargo from production line to loading port
2. 6000MT cargo delivery by bulk vessel to All over the world monthly

By containers shipment:

Loading Port :Dalian

1. It is 257 kilometers away from Dalian port and about 3 hours by land transportation.
2. Load over 250 containers from Dalian port weekly

Professional Team

Magnesium Oxide Application

- | | |
